

DNA Test Report

*Animal Molecular Genetics Laboratory
University of Missouri
College of Veterinary Medicine*

Owner Information

Owner: Amy Doster
Address: 905 Northwood Dr NE
City-St-Zip: Salem, OR 97317

Dog Information

Call Name: Prince *Breed:* Dachshund
Registered Name: Porth's Wroyal Prince of Squire ML
Reg Number: HP10551704
Sex: Male *Birthdate:* 5/23/2004

AMGL Case #: 62232 *DNA Source:* FTA-swab
Testing Date: 11/14/2008
Test Run: PRA – Progressive Retinal Atrophy *Result:* Carrier

Explanation of results:

NORMAL: This dog has tested normal (or clear) for the mutation causing the cone-rod form of PRA prevalent in this breed. It can only transmit a normal gene to offspring, and can be bred to a dog with any test result without producing affected offspring.

CARRIER: This dog has tested as a carrier for the mutation causing the cone-rod form of PRA prevalent in this breed. It is very unlikely to develop this form of PRA, but it may transmit either a normal gene or an affected gene to offspring.

AFFECTED: This dog has tested as affected for the mutation causing the cone-rod form of PRA prevalent in this breed. It is at risk for developing clinical symptoms of PRA at some point in its lifetime. We do not presently have a way to predict when symptoms may appear.

Additional details available online at www.CanineGeneticDiseases.net, in PRA section.
